Unprecedented equity financing level versus traditional grants

Of the EUR 47.15 million in new financing commitments approved by NDF’s Board of Directors in 2018, only EUR 8.65 million (18%) was given out as grant, with the remaining EUR 38.50 million (82%) released as equity financing, loans or reimbursable grants. The corresponding ratio the previous year was almost antithetical at 29% equity versus 71% grants, demonstrating a sizeable shift this year in our funding portfolio towards financing instruments other than grants.

We see the benefits of this profound shift from traditional grants towards blended financing as two-fold. First, it promotes the longevity and viability of NDF-backed projects, and second, the use of equity investments helps enable a climate funding environment that will increasingly spur much-needed private sector involvement.

NDF higher-risk mandate leads the way for private equity

NDF as a funding partner is mandated to take on larger risks than many other financing mechanisms, for example in testing new climate technologies or experimenting with new market readiness approaches.

In climate change adaptation, private sector technologies and solutions can be key in helping governments and civil society scale up for transformation. In support of this, in 2018, NDF approved an equity investment in CRAFT, the world’s first market-driven fund for climate resilience. This followed on from a preparatory grant given in 2017 to help get this unique fund off the ground and into the investor spotlight. CRAFT has been heralded by the international investor and development communities as one of this year’s most promising new funding approaches.

Climate action has never been more urgent

During 2018, NDF’s newly-approved funding for nine new projects, corresponded to annual avoided CO2 emissions of an estimated 2.3 million tonnes, or the equivalent of 3 million people flying from Helsinki to Paris and back.

In the wake of the 2018 IPCC report and alarming UN predictions that put the window for averting global climate disaster at only 12 years, never has the work of NDF been more urgent or more relevant. With the adoption of the Paris agreement and the subsequent development of the Paris Rulebook, the time for increased action has now come.

To underscore this, NDF’s 2018 results were characterised by a strong uptick in funding demand, notably from qualified recipients in all regions, and for viable climate-related projects that reflect NDF’s mandated goals. In light of the overwhelming need at the macro-level, and given the growing demand for viable project funding, NDF clearly has a growing and much-needed role to play in global climate change funding and in assisting developing countries in the path towards green growth and climate resilience.

Leena Klossner
Acting Managing Director
During 2018, NDF’s Board of Directors agreed on a roadmap to take forward the process for considering the future scenarios for NDF. As a part of this process, the Board agreed to conduct an ex-
ternal institution-wide evaluation of NDF, including an evaluation of
the already completed projects. The evaluation shall be seen as part of a longer process that leads to the next step in the discussion about NDF’s future options and the strengthening of NDF. The evaluation will be coordinated by the Expert Group for Aid Studies and undertaken by the consultancy firm Particip Gmbh.

In late 2018, the Board of Directors initiated the recruitment process for a new Managing Director for NDF.

In the wake of this year’s dire report of the UN Intergovernmen-
tal Panel on Climate Change (IPCC) and the United Nation’s (UN) predictions that the world has just 12 years to turn climate change around, it can be argued that never has the work of NDF been more urgent and, indeed, more relevant. To underscore this urgency, 2018 was marked by a strong uptake in demand for funding for viable climate resilience projects, in line with NDF’s mandated goals.

Projects and results

At the end of 2018, NDF’s project portfolio consisted of 113 completed or on-going projects’ launched under NDF’s current climate change and development mandate effective since 2009, with a total NDF financing of EUR 375 million. In 2018, 85 of these projects were on-going at various stages of implementation in sixteen countries across Africa, Asia and Latin America. Ten projects reached their completion in 2018.

NDF has a strong focus on monitoring the progress and results of its activities. The Reality Rating Framework serves as a management tool to assess the achievements both on the portfolio and on the individual project level. The framework consists of (1) a management tool to assess the achievements both on the portfolio level results and on the individual project level. The framework consists of (1) Strategic and policy issues

Climate change, development and the Nordic identity continued to form the core strategic principles for the Nordic Development Fund (NDF) during 2018. Through a strategic focus on catalytic role and leverage, project preparatory funding, support for innovation, support for private sector development and linkages between the public and the private sectors, piloting of interventions with a high-risk level, and identification of emerging climate change issues, NDF was able to provide financing for value-adding programs and projects advancing the global sustainable development agenda.

NDF’s 2018 results were characterized by a sizable shift in the funding portfolio towards financing instruments other than grants. Of the EUR 47.15 million in financing approved by NDF’s Board of Directors this year, EUR 16 million was in loans and EUR 17.15 million in equity, and EUR 5 million was a reimbursable grant; only around EUR 9 million was approved as grants. This puts the ratio of non-grants to grants this year at 18:1. In 2017, the corresponding ratio was almost opposite at 29:71. This profound shift away from grants towards blended financing is a very good way to promote the viability of NDF’s projects. The increased use of loans and equity investments also serves to enable a development environment that will increasingly be led by the private sector.

Taking on management of the Energy and Environment Partnership Trust Fund covering Southern and Eastern Africa (EEP Africa) marks the first time NDF is administering funds on behalf of other donors. The EEP is a new funding vehicle for NDF and part of a broader portfolio shift toward more private sector-oriented activities and financing.

NDF as a funding partner is also mandated to take on larger risks than many other financing mechanisms, for example in testing new climate technologies or approaches for market readiness. Our new funding commitment this year to the market-driven equity fund, Climate Resilience and Adaptation Finance and Technology Transfer Facility (CRAFT), is a case in point, where NDF has combined the funding portfolio towards financing instruments other than grants. Of the EUR 47.15 million in financing approved by NDF’s Board of Directors this year, EUR 16 million was in loans and EUR 17.15 million in equity, and EUR 5 million was a reimbursable grant; only around EUR 9 million was approved as grants. This puts the ratio of non-grants to grants this year at 18:1. In 2017, the corresponding ratio was almost opposite at 29:71. This profound shift away from grants towards blended financing is a very good way to promote the viability of NDF’s projects. The increased use of loans and equity investments also serves to enable a development environment that will increasingly be led by the private sector.

The increased use of loans and equity investments also serves to enable a development environment that will increasingly be led by the private sector.
Operational Highlights in 2018

During 2018, NDF’s Board of Directors approved financing amounting to EUR 47.15 million for nine new projects. These new commitments included EUR 16 million as loan, EUR 17.15 million as equity, EUR 5 million as a reimbursable grant and EUR 8.65 million as grants. This means that about 82% of NDF’s new commitments were made utilising instruments other than grants. In 2017, the corresponding amount was 29%.

Of the new commitments, two were made through NDF’s Small Grant Facility (SGF), which supports grants of up to EUR 500,000. SGF grants, while being subject to the same criteria as larger grants, often involve preparatory financing, designed to have high leverage potential and catalytic impact.

During 2018, the following themes predominated NDF’s new funding initiatives:

- **Blended financing**: In line with the strategy to expand NDF’s portfolio towards blended financing, NDF increased equity financing instruments versus traditional grants. In particular, NDF is using blended financing to spur clean energy investments in developing countries and expand market-based climate resilience solutions globally.

- **Private sector adaptation**: In support of the need for governments and civil society to urgently scale up knowledge, technologies, and financing options for climate resilience, NDF has invested in CRAFT, the world’s first market-driven climate change adaptation fund.

- **Catalytic financing for coastal resilience**: NDF is providing catalytic funding for climate resilience solutions along the heavily populated West African coastline, where the extent and impact of climate change, particularly coastal erosion, has reached a critical juncture.

The following projects benefitted from different NDF financing instruments during 2018:

The 2018 Results report shows that the institutional, portfolio and project levels results can be described as highly satisfactory overall. The institutional level indicators illustrate how well the activities are aligned with the current strategy. The indicators show that the projects approved in 2018 are very strongly aligned with all of NDF’s focal areas. This consistency is a result of a continued intensified focus on comprehensive strategic compliance. The aim to finance projects that promote adaptation to climate change and climate change mitigation is clearly reflected in the large share (84%) of new commitments that have a dual focus on both adaptation and mitigation.

The Project Performance Rating (PPR) system is part of the framework and the main tool used to report progress and results at the portfolio level. Each project is assessed once a year. The results from ratings made during 2018 show that approximately 77% of the on-going projects are classified as highly satisfactory or satisfactory regarding progress towards objectives, overall project process and risk.

A final PPR is also made for all completed projects. In 2018, ten projects reached their completion. All of them successfully achieved all their intended objectives and results.

The 2018 Results report indicates that the performance ratings reported for individual projects are consistent with the overall results for the institution.

Based on the assessments, a summary results report is published annually.

Blended finance to fast track renewable energy investments

NDF has made a EUR 5 million investment into Climate Investor One (CIO) to finance the development phase of profitable and sustainable renewable energy projects - in this case, wind, solar and hydro - while bringing down the cost of clean energy for consumers in Africa, Asia and Latin America.

CIO’s blended structure is a unique whole-of-life approach offering investment opportunities to a range of investors with varying risk-return profiles and mandates, from public donors to commercial and institutional investors. This approach matches the varying capital requirements and levels of risk of different stages of the lifecycle of renewable energy projects.

NDF has committed an additional grant of EUR 1.25 million and equity financing of EUR 9 million to the African Guarantee Fund (AGF), to support scale-up of AGF’s pioneering Green Guarantee Facility, tasked with unlocking access to finance for Small and medium-sized enterprises (SME) -led low-carbon, climate-resilient green growth across Africa.

Uniquely targeted equity enabling private sector adaptation

The Climate Resilience and Adaptation Finance and Technology Transfer Facility (CRAFT) has been set up to rapidly mobilise private and public capital for climate adaptation investments around the world, and has been heralded by the international investor and development communities as one of this year’s most promising new funding approaches.

Climate change is increasingly affecting global economies and the need for adaptation is urgent. What sets CRAFT apart is that it has identified 20 target market segments where companies already offer climate resilience solutions. These opportunities are in areas such as weather and agricultural analytics, disaster risk modelling, and distributed water solutions.

CRAFT will be the first private equity fund to approach resilience from a purely private sector point of view. That means focusing on growth equity investments in companies already active in the climate adaptation space that are ready for scale.

NDF’s newly-approved EUR 8.5 million equity investment, together with a EUR 1.5 million grant, are following on from an initial preparatory grant of EUR 0.5 million, made together with a grant from the Global Environment Facility (GEF), to help get this unique fund on its feet.

While the mitigation gap has largely been closed, we still have a long way to go on the adaptation gap. The United Nations Environment Program (UNEP) has identified three barriers to adaptation: financing, technology and knowledge; CRAFT addresses all three.

Catalytic climate funding for a resilient West African coastline

NDF is supporting the West Africa Coastal Areas Program (WACA) with the goal of strengthening climate resilience along the coastal regions of Benin and Senegal, as well as promoting more integrated and joint action in combating climate change in a further 17 coastal countries. NDF’s contribution, provided in partnership with the World Bank (WB), will also go towards the establishment of a WACA platform, with the goal of leveraging public and private financing of USD 2 billion for coastal resilience investments between now and 2023. The program presents a good example of how a small amount of seed funding from NDF can catalyse much larger investments.

There are rapidly growing coastal populations, including capital cities, dependent on the coast and sea for their livelihoods, and who are increasingly vulnerable to climate change, including sea level rise, extreme weather events, flooding and coastal erosion. The WACA platform will focus, among others, on supporting infrastructure projects by promoting a knowledge base for governments and businesses dealing with changing conditions. Examples include early warning weather systems for fishers and farmers as well as green infrastructure planning. Port construction is a case in point, known to speed up coastal erosion but good for tourism and trade.
Nordic Climate Facility (NCF)
The Nordic Climate Facility (NCF) is a challenge fund set up by NDF to finance early-stage climate projects while stimulating local business and employment opportunities in the developing world. NCF financing is allocated on a competitive basis with thematic calls for proposals arranged annually.

The theme of NCF’s eighth call for project proposals (NCF 8), issued in August 2018, is “Testing the business viability of climate solutions,” which is very much in keeping with NCF’s organisational tagline, Climate as Business. The goal of this call has been to discover bankable climate solutions with clear and measurable impacts that can be further developed into sustainable business models beyond NCF’s grant financing. NCF 8 received 121 applications and 26 have been selected to submit full proposals.

During 2018, the 13 signed and selected projects from NCF’s seventh call began their implementation, or preparation for implementation. Several of these projects provide climate adaptation solutions for farmers and other communities affected by climate change. These include affordable mobile weather forecasting technologies, probiotics for livestock to increase milk productivity and thus enhancing farmers’ resilience, as well as a fast-response flood barrier, which inflates using the flood water itself. Other projects aimed at mitigating or avoiding greenhouse gas emissions include pay-as-you-go solar solutions for off-grid homes and solar-powered industrial heaters for tea processing. A notable 77% of the lead implementers were companies operating on a commercial basis, demonstrating a marked shift towards blended financing.

In total, NCF 8 received 121 applications and 26 have been selected to submit full proposals. A notable 77% of the lead implementers were companies operating on a commercial basis, demonstrating a marked shift towards blended financing.

Energy and Environment Partnership (EEP)
Launched in 2018, the Energy and Environment Partnership Trust Fund covering Southern and East Africa (EEP Africa) has become NDF’s newest blended finance vehicle for mobilising private sector resources and partnerships for clean energy and green growth. EEP Africa currently receives funding support from Austria, Finland, and NDF.

The small CfA, which was fully launched in August 2018, is “Testing the business viability of climate solutions,” which is very much in keeping with NCF’s organisational tagline, Climate as Business. The goal of this call has been to discover bankable climate solutions with clear and measurable impacts that can be further developed into sustainable business models beyond NCF’s grant financing. NCF 8 received 121 applications and 26 have been selected to submit full proposals. Report of the Board of Directors 2018

Contribution to UN’s Sustainable Development Goals (SDGs)
NDF is increasingly seeking to ensure that its activities contribute towards the achievement of many of the UN’s SDGs. The nine new projects approved by NDF in 2018 particularly target the following SDGs.

Knowledge management and outreach
Knowledge management and dissemination of results has remained in focus as one component of NDF’s added value. Through various activities, NDF has strived to share the results and lessons learned from on-going and completed projects while at the same time promoting overall knowledge and awareness of NDF among different stakeholders.

NDF has participated in and contributed to high-level conferences, seminars and visits with its current and new partner organisations such as the third Africa Climate Resilient Infrastructure Summit (ACRIS) in Marrakech in Morocco in February. Another example is the first partner meeting of the City Resilience Program (CRP) in September 2018 in Bern, Switzerland to which NDF was invited by the World Bank.

NDF has also arranged climate-focused seminars and workshops on specific themes in the context of visits made to NDF by experts from partner institutions and other relevant organisations. For example, NDF hosted a seminar on climate change and transport between representatives from the National Road Administration (ANE) in Mozambique and consultants from Finnish Overseas Consultants (FINNOC). The visit was part of an overseas study tour to Finland and Sweden for Mozambican road authorities financed under the NDF-funded project: "Developing Capacity for a Climate Resilient Road Sector in Mozambique."

NDF’s projects received strong visibility during the year: An example of strong project visibility was the high-level green finance conferences supported by NDF and jointly arranged with the African Guarantee Fund (AGF), International Trade Centre and African Development Bank in Abidjan, Cote d’Ivoire, in June. Also the NCF roadshow to the Nordic capitals in the spring created positive attention for NDF. Under the banner of the EEP Africa, NDF sponsored a series of clean energy investor events, one in Cape Town, South Africa, in May and a second in Nairobi, Kenya, in December.

The twenty-fourth Conference of Parties (COP24) to the UN Framework Convention on Climate Change (UNFCCC) took place in Katowice, Poland in December 2018. NDF participated in a number of events focusing on a broad range of topics relating to NDF’s activities and strategic core areas. NDF also co-hosted the Finance Day as a joint event of NDF, Nordic Investment Bank (NIB) and Nordic Environment Finance Corporation (NEFCO), in collaboration with the Nordic Council of Ministers at the Nordic pavilion.

NDF has continued to be an active member of the Global Green Growth Knowledge Platform (GGKP). GGKP is a global partnership of international organisations and experts that identifies and addresses major knowledge gaps in green growth theory and practice. NDF also participated in the GGKP 6th Annual Conference...
at Organisation for Economic Co-operation and Development (OECD), Paris in November 2018.

NDF produced two newsletters in English and an electronic newsletter four times during the year. In addition, a Results Report for 2017 was published in March and a publication under the title “Spurring climate innovation through challenge funds” in November.

NDF has continued to monitor the outreach of its electronic communications - the website, the electronic newsletter, LinkedIn, Facebook and Twitter. The monthly monitoring reports and statistics have guided the planning of the communications activities during the year.

Partner Institutions
NDF has continued to co-finance with the multilateral development banks (MDBs). In Africa, the main partners have been the World Bank (WB) and the African Development Bank (AfDB). In Asia, NDF continues to have a good partnership and a well-performing portfolio with the Asian Development Bank (ADB) where several new leads for potential co-finance were identified during 2018. With the World Bank, NDF continued to work on transport sector financing in Laos which also opened up a collaboration with the Danish Infrastructure Investment Bank (AIIB). In Latin America, NDF has a well-functioning partnership with the Inter-American Development Bank Group (IDB). During the year, NDF has also opened selected new strategic focal areas. Together with the fund manager Lightsmith Group, NDF is supporting the creation of the first global investment fund for climate resilience (CRAFT). Through collaboration with the Climate Investor One, NDF supports development of renewable energy investments. Other new partners include the Conservation International, the Nature Conservancy and the Confederation of Danish Industries, to name a few.

Climate Innovation Lab
The Global Innovation Lab for Climate Finance identifies, develops and launches innovative financial instruments for sustainable development and action on climate change. The Lab is a network of public and private institutions, including NDF, that helps develop well-designed financial instruments that, with appropriate public support, can reduce private investors’ risks in global efforts to address the adaptation and mitigation needs of developing countries. The Lab Secretariat, Climate Policy Initiative, has been an important knowledge partner for NDF in providing analytical input on these instruments. Supporting the core principles of the NDF strategy, the Lab provides a good channel for NDF to identify innovative climate financing initiatives for further financing and development in the risky early phases. During 2018, NDF participated in the Lab Innovation Summit hosted by the Rockefeller Foundation and organised in the margins of the New York Climate Week. In this context, NDF was noted as the institution which, to date, has funded the largest number of early-stage financial instruments developed through the Lab.

In the Nordic Climate Facility and the Energy and Environment Partnership for Africa Trust Fund continued to provide a large number of new partnerships with a number of new stakeholders predominantly in the private sector.

Cooperation with Nordic institutions
NDF has been in a dialogue with both the Nordic Council and the Nordic Council of Ministers in issues relating to climate change and development but also regarding the overall structure of the Nordic development and climate finance architecture. There have been several on-going discussions on NDF’s role in this context. NDF strives to be an active partner in those discussions to strengthen NDF’s role in the future.

As part of the climate cooperation with NIB, NDF rents office premises from and acquires administrative services from NIB in the field of e.g. HR and IT services, accounting and financial management. Internationally, this administrative collaboration is based on service agreements between NDF and NIB, subject to review from time to time.

In the field of anti-corruption and integrity issues, the cooperation with NIB and NEFCO has continued throughout 2018. The most visible form of this cooperation, which formally is based on a tripartite Memorandum of Understanding, was an integrity seminar arranged for the staff of all three organisations in November.

During the latter half of 2018, a visible interest to find new ways for a closer collaboration between NIB, NEFCO and NDF has developed. The work has been organised through working groups, which started their work in August 2018. During 2019, areas and opportunities for an intensified collaboration will be explored in more detail.

Institutional issues
Policies and Regulations
In view of entry into force of the EU General Data Protection Regulation (GDPR) in May 2018 concerning the collection, use and storage of personal data, NDF has in 2018 adopted a Privacy Policy and revised its Access to Information Policy. The preparatory work for the Privacy Policy took place in collaboration with NIB, which introduced a similar policy for the bank.

Board of Directors
The Chair of the Board of Directors for the period 1 January to 30 April 2018 was Egil Høiter Gishusinn (Iceland), with Hans Olav Brekk (Norway) as Deputy Chair. As of 1 May 2018, Hans Olav Brekk took over the chair with Lars Roth (Sweden) as Deputy Chair.

In addition, the following changes took place in the Board membership in 2018. As of 15 May 2018, Henrik Siljaer Nielsen was appointed alternate (Denmark), succeeding Ni Laugel Gerlott. As of 17 January 2018, Marita Olson was appointed alternate (Sweden), succeeding Linda Nilsson.

A list of NDF Board members and their alternates can be found on page 19.

Control Committee
The Control Committee ensures that NDF’s operations are conducted in accordance with its Statutes. The Committee is responsible for the financial audit of the Fund. The audit of NDF is carried out by professional auditors, appointed by the Control Committee.

As of March 2018, Jan-Erik Enestam succeeded Bill Fransson as Chairman of the Control Committee. In accordance with an audit firm rotation policy, Ernst & Young succeeded KPMG as external auditors.

The Control Committee presented its annual auditor’s report to the Nordic Council of Ministers in March 2018 (which the Nordic Council of Ministers approved in June 2018). The Control Committee met twice in 2018. A list of the members of the Committee can be found on page 19.

Administration
Paul Halfman’s term as Managing Director ended 31 October 2018. Leena Klosner was appointed Acting Managing Director. A recruitment process for a new Managing Director was initiated by the Board of Directors. As of 31 December 2018, NDF had eighteen full-time positions, of which the position of Managing Director and Procurement Specialist/Program Manager were vacant pending finalisation of recruitment processes. Out of the full-time employees, five were employed on temporary contracts financed by the NDF and the EEP Africa challenge funds. In addition, NDF had at year-end two temporary part-time trainees.

The staff consists of seven (35%) male and eleven female (65%) members, representing four different nationalities. A list of the employees can be found on page 19.

The growing portfolio and related activities have required increased input from the staff and accentuated the importance of human resources.
to carefully monitor the overall workload and efficient resource utilisation to ensure the well-being of staff. The NDF office has, along with the NIB headquarters, been certified as a Green Office by WWF Finland since 2009. In 2018, improved follow-up on use of paper was introduced. NDF’s carbon footprint in 2018 amounted to 168 tons of CO₂. The biggest share of the carbon footprint comes from air travel, which in 2018 amounted to 143 tons of CO₂ equivalents. The direct reduction of greenhouse gases for the NDF mitigation projects approved during 2018 has been estimated at 2,519,420 tons of CO₂ equivalents.

Financial issues
During 2018, total disbursements to climate projects amounted to EUR 28.5 million, of which EUR 6.25 million were joint co-financing projects, EUR 9 million as equity and EUR 13.2 million to parallel co-financing projects. The total sum also includes disbursements to sub-projects under NCF. At the end of the year, accumulated disbursements to climate change projects since 2009 amounted to EUR 272 million.

NDF disbursements 2018 EUR 28.5 million

A total of EUR 0.2 million was disbursed to old credit projects during 2018 (EUR 0.1 million).

The net result for the year before adjustments for currency exchange fluctuations and after disbursements of grant aid totalled EUR -15.9 million in comparison with EUR -34.7 million the previous year. The end net result is EUR -11.5 million for 2018, compared to EUR -49.9 million in 2017.

Instruments
NDF operates with several types of financing instruments. Depending on project type, NDF can contribute and blend grants, credits and equity. Historically, NDF has focused on credits, but with the climate mandate established in 2009 both grants and equity have played an increasingly large role as seen in 2018.

Capital and accounting currency
NDF changed its capital and accounting currency from Special Drawing Right (SDR) to EUR on 1 January 2001. Fluctuations in the SDR/EUR exchange rate lead to variations in financial results, positive or negative, from one year to another. Since 2012, hedging measures have therefore been taken to decrease the effect from the exchange rate fluctuations.

The Fund’s financial result for 2018 shows a foreign exchange difference of EUR 5.2 million before hedging and EUR 4.4 million after hedging (2017: EUR -17.6 million before hedging and EUR -15.2 after hedging). This difference is largely due to the fact that the US dollar, which represents 41.9% of the SDR currency basket, strengthened during 2018 against NDF’s capital and accounting currency, the euro.

Liquidity and capital
The liquid assets of NDF were managed by a commercial bank on behalf of NDF. Based on NDF’s Liquidity Policy, the assets are placed in green bonds, green equity funds, moderate yield funds and deposits, altogether yielding an average interest rate of approximately 0.6% (2017: 0.4%).

The green bonds have an average maturity of six years and NDF’s deposits are placed on 1 to 12-month intervals. The liquidity as per 31 December 2018 was EUR 105.8 million (2017: EUR 106.6 million) of which EUR 24.6 million was placed in parallel co-financing projects. The total sum also includes donations and reflows coming from the outstanding credits.

The income statement, balance sheet, changes in equity, cash flow and notes can be found on pages 20–37.

Salaries and ancillary expenses of EUR 1,724,208 (2017: EUR 1,665,180).

The Fund’s income during 2018, amounting to EUR 5,609,474 (2017: EUR 5,669,474), consisted of income from credits to the public sector to the amount of EUR 5,341,402 (2017: EUR 5,244,377), interest on placements with credit institutions of EUR 361,339 (2017: EUR 5,772,555) and EUR 170,282 (2017: EUR 422,810) as remuneration on equity loans and other loans. Zimbabwe continues to be in arrears to NDF. All of its accrued, outstanding obligations towards NDF have therefore been placed in non-accrual status, and in line with the World Bank’s recommendations, an impairment loss of 50% has been made.

Administrative expenses were EUR 3,083,292 (2017: EUR 2,816,326). The largest single item of expenditure consists of salaries and ancillary expenses of EUR 1,724,208 (2017: EUR 1,665,180).

The income statement, balance sheet, changes in equity, cash flow and notes can be found on pages 20–37.
Report of the Board of Directors 2018

Helsinki, 8 February 2019

BOARD OF DIRECTORS *

DENMARK
Dorthea Damkjaer, Special Advisor, Ministry of Foreign Affairs
Deputy: Henrik Skaare, Chief Consultant, Team Leader, Ministry of Foreign Affairs

FINLAND
Max von Brandstetter, Director, Ministry for Foreign Affairs
Deputy: Heli Mikkola, Senior Adviser Development Cooperation, Ministry for Foreign Affairs

ICELAND
Egill Heidar Gislason, Advisor
Deputy: Sigfús Ólafsson, Manager Marketing, VP Aircraft Marketing, Castlelake

NORWAY
Hans Olav Ibrekk, Policy Director, Ministry of Foreign Affairs, Chair of the Board
Deputy: pending nomination

SWEDEN
Lars Roth, Deputy Director, Ministry for Foreign Affairs, Vice-Chair of the Board
Deputy: Mats Slotte, Manager, Financial Administration

GLOBAL
Johanna Zilliacus, Project Officer, Nordic Climate Facility

REPORT OF THE BOARD OF DIRECTORS

The Board of Directors of Nordic Development Fund (NDF) comprised of: Dorthea Damkjaer, Hansen Olav Ibrekk, Max von Brandstetter, Leena Klossner, Egill Heidar Gislason, Lars Roth.

NDF’s Board members and administrative staff.

REPORT OF THE BOARD OF DIRECTORS 2018

HANS OLAV IBBREKK Chairman

LEENA KLOSSNER Acting Managing Director

LARS ROTH Deputy Chairman

MAX VON BRANDSTETTER

REPORT OF THE BOARD OF DIRECTORS 2018

CONTROL COMMITTEE *

CHAIRMAN
Jan-Erik Enestam, Managing Director

DENMARK
Sjúrður Skaale, Member of Parliament
FINLAND
Arto Pirttilahti, Member of Parliament
ICELAND
Viljhálmur Árnason, Member of Parliament
NORWAY
Michael Trivisonno, Member of Parliament
SWEDEN
Johan Andersson, Member of Parliament

AUDITORS APPOINTED BY THE CONTROL COMMITTEE

As of 7 March 2018
KPMG, Finland, Responsible partner: Marcus Tötterman, Authorised Public Accountant
KPMG, Sweden, Responsible partner: Anders Tagdol, Authorised Public Accountant

As of 8 March 2018
Ernst & Young, Finland, Responsible partner: Terhi Mäkinen, Authorised Public Accountant
Ernst & Young, Sweden, Responsible partner: Mona Alfredsson, Authorised Public Accountant

Secretary to the Control Committee
Marcus Tötterman, KPMG, Finland

Secretary to the Control Committee
Terhi Mäkinen, Ernst & Young Finland

MANAGEMENT AND STAFF *

Leena Klossner, Acting Managing Director
Christina Stenvall-Kekkonen, Vice-President, Chief Counsel

Marjasta Sjöstedt, Program Manager

Isa Kujansuu, Legal Trainee

Mats Slotte, Manager, Financial Administration

Maria Talari, Administration and Communications Officer

Charles Wetherill, Manager of Energy and Environment Partnership

Johanna Öhman, Project Officer, Nordic Climate Facility

* As of 31 December 2018

Notes to the financial statements

Reporting entity

The statutory purpose of the Nordic Development Fund (“NDF” or “Fund”) is to promote economic and social development in developing countries through participation in financing, on concessional terms, of projects of interest to the Nordic countries. As the Nordic countries’ joint international development financing organisation, NDF focuses on climate change and development-related interventions in low-income and lower-middle income countries. NDF flexibly provides financing in the form of grants, interest-free loans, subordinated loans and equity.

NDF was established by an agreement between the five Nordic countries namely Denmark, Finland, Iceland, Norway and Sweden, signed on 3 November 1988. The Fund’s operations commenced on 1 February 1989. A new Agreement on the Nordic Development Fund was signed on 9 November 1998, replacing the agreement of 1988.

NDF is governed by the provisions of the 1998 Agreement and the pertaining statutes (the “Statutes”) as amended from time to time. In addition, there is a Host Country Agreement between NDF and the Government of Finland (“Host Country Agreement”), which was signed on 15 October 2013 and entered into force on 11 May 2014.

NDF has the legal status of an international legal person, with full legal capacity and is vested with some privileges and immunities typical for an intergovernmental financial organisation, such as exemption from credit policy measures and payment restrictions, protection from search and seizure of its property and assets, inviolability of its premises, and broad tax exemptions.

The headquarters of the Fund are in Helsinki, Finland, at the premises of the Nordic Investment Bank.

The capital base of the Fund, which has been subscribed and paid-in by the Nordic countries is equivalent to EUR 1,021,405,000.

Summary of significant accounting policies

Basis of preparation of financial statements

The financial statements have been prepared in accordance with methods of valuation and recognition of income and expenses as described below. With the exceptions noted below, they are based on historical cost. The Fund’s financial statements are presented in EUR.

Assessments in preparation of financial statements

The preparation of financial statements requires management to make assessments and estimates that affect the result, financial position and additional disclosures. Such assessments and estimates are based on available information. Actual results may differ materially from the assessments made.

Foreign currency conversion

Monetary assets and liabilities denominated in currencies other than EUR are converted into EUR at the rate quoted by a leading market data provider (see Note 12). Any gain or loss arising from the valuation appears in the income statement as “Foreign exchange differences” and are mainly related to the SDR rate. As NDF will for many years to come have outstanding credits denominated in SDR, changes in the SDR-EUR rate may lead to the income statement showing substantial foreign exchange differences since these currency positions are not 100% hedged against changes in foreign exchange rates. However, in accordance with the Hedging Policy, measures have been taken to reduce the effects from the foreign exchange differences by hedging 50% of the credits denominated in SDR.

Non-monetary assets are recorded in EUR at the EUR rate prevailing on the date of their acquisition.

Laos is dependent on road transport for its economy but its roads are increasingly degraded by climate change impacts like flooding and land and mud slides. This NDF project is making the country’s most heavily trafficked road safer, more accessible and more climate resilient.

Notes to the financial statements

Cash and cash equivalents
“Cash and Cash Equivalents” consist of monetary assets and placements with an original maturity of up to 6 months.

Derivative instruments
Approximately 50% of the SDR loan portfolio is protected against exchange rate effects through currency options. The derivative instruments are valued at fair value at the end of the year and the change in fair value is recognised in the income statement. NDF utilises both forward and deposition contracts for liquidity management purposes. NDF has forward and deposition contracts with a commercial bank.

Placements with credit institutions
NDF has during 2018 invested monetary assets with a commercial bank at current market interest rates. The placements are initially recognised at cost (normally nominal value) at settlement date. Placements are also recorded at cost in the annual report. Accrued interest on placements is recorded within “Accrued Income” in the balance sheet. Placements with credit institutions for longer than 6 months are shown as investments in the Cash Flow Statement.

Credits to sovereign states
The recipient countries for NDF credits are primarily low-income developing countries. The credit period for credits to sovereign states is 25-40 years, including a 5-10 year grace period. The loans are interest-free.

The credits are initially recognised at cost at settlement date. For payments, which are more than 180 days overdue, the Fund places all credits to the borrower in question in non-accrual status, whereupon the Fund stops recording accrued service charges and fee and commission revenue as income on the income statement. All accrued but unpaid income in respect of the borrower in question that had been recorded as income is then deducted from the income statement. As of 31 December 2018, Zimbabwe was more than 180 days overdue with payments. In line with the World Bank’s principles for handling Zimbabwe’s credits, NDF has made a 50% impairment loss on Zimbabwe’s outstanding credits and payables to NDF.

There is considerable concessionality in the credits from NDF as they are interest-free and have very long maturities.

Provision for loan losses
NDF’s lending conditions allow for a long-term view to be taken of the repayment capacity of recipient countries. In the event of debt consolidation, it is assumed that credits from NDF will be treated in the same manner as loans from other multilateral financing institutions (preferred creditor status).

Credits outstanding are recognised in the balance sheet at their recoverable amount. Loans to sovereign states are recorded net of provisions for possible loan losses and actual loan losses. Provision for possible loan losses is established based on the assessment of the nature and maturity structure of the credit portfolio.

Other loans
Other loans outstanding consist of loans with financial liability features to the private sector. The loans are initially recognised at cost at settlement day. In the balance sheet, other loans are recorded net of provisions for actual and possible loan losses. A provision for possible loan losses is established based on the assessment of the nature and maturity structure of the loan portfolio.

Loans with equity features and equity investments
The Statutes of NDF enable the Fund, as an integrated and permanent part of its operations, to provide financing to private sector activities in developing countries in the form of loans with equity features and equity investments. Loans with equity features and equity investments are recognised in the balance sheet at cost after write-down. The value of outstanding loans with equity features and equity investments are continuously revalued by the Fund. If the book value exceeds the valuation made, a corresponding write-down is made. Write-downs are presented separately in the income statement.

Notes to the financial statements

Climate change in Tegucigalpa, Honduras means dealing with drought, heavy rains and landslides. In two low-income neighbourhoods, NDF has successfully worked in partnership with planners and locals to complete a climate change adaptation project, putting affordable upgrade plans like this retention wall into action. Photo: Aage Jørgensen
**Intangible assets**

Intangible assets mainly consist of investments in software and software licenses for IT systems. The investments are carried at historical cost and are amortised over the assessed useful life of the assets, which is estimated to be between 3 and 5 years. The amortisations are made on a straight-line basis.

**Tangible assets**

Tangible assets are recognised at historical cost, less any accumulated depreciation based on their assessed useful life. The depreciation period for tangible assets is determined by assessing the individual item, usually three to five years.

Write-downs and impairment of intangible and tangible assets

The Fund’s assets are reviewed annually for impairment. If there is any objective evidence of impairment, the impairment loss is determined based on the recoverable amount of the assets.

**Equity**

In August 2000, the Nordic Council of Ministers passed a resolution to increase the capital of NDF by EUR 330 million. After this replenishment, the capital of NDF amounted to SDR 515 million and EUR 330 million. As of 31 December 2018, SDR 515 million—the equivalent of EUR 691.4 million—and EUR 330 million, totalling EUR 1.021 billion that has been paid in by the member countries.

Future operations will build on the existing liquidity and the refinances coming mainly from the 188 outstanding credits, which NDF granted during the years 1989-2005. (see note 3). The last repayment for these credits is due in 2045.

**Income from service and commitment charges, loans with equity features and equity investments**

The Fund’s long-term lending to sovereign states is interest-free, but a service charge of 0.75%-1.25% per annum is collected on outstanding amounts. A commitment charge of 0.5% per annum is collected on any undisbursed balance commencing 12-18 months after the loan agreement has been signed. Income from other loans is presented within Service charges from credits in the income statement. Income from loans with equity features is normally related to the return received by the shareholders of the company.

Income from service charges on lending and income from loans with equity features and equity investments are presented as separate items in the income statement. Commitment charges are presented within Fee and commission income.

**Financing of grant projects**

Disbursements to climate projects that are in the form of grants, are recorded as a cost under “Grant financing for climate projects” in the income statement. Disbursements in the form of equity, are accounted for in the balance sheet under “Loans with equity features and equity investments.” Upon completion of a project or cancellation of a grant, any refund is written back as a reduction of the total costs for the year under “Refund of grant financing.”

**General administrative expenses and host country reimbursement**

On the basis of the Host Country Agreement, NDF receives a host country reimbursement from the Finnish government equal to the tax levied on the salaries of the Fund’s employees. The host country reimbursement, which the Fund received in 2018, amounted to EUR 652,083 (2017: EUR 636,672). The payment reduces the Fund’s administrative expenses as shown in Note 10.

**Employee pensions and insurance**

The Fund is responsible for arranging pension security for its employees in accordance with the Host Country Agreement. As part of the Fund’s pension arrangements, the Fund has decided to apply the Finnish public sector pension system. Contributions to this pension system, which are paid into the Finnish State Pension Fund, are calculated as a percentage of salaries. The Finnish Ministry of Finance determines the basis for the contributions and establishes the actual percentage of the contributions according to a proposal from the local government pension institution Keva (see Note 10). NDF also provides its permanent employees with a supplementary pension insurance scheme, arranged by a private pension insurance company. This is a group pension insurance based on a defined contribution plan. The Fund’s pension liability is completely covered.

In addition to the applicable local social security systems, NDF has taken out for example comprehensive, accident, life, medical and disability insurance policies for its employees in the form of group insurances.

Fixed income consists of green bonds issued by financial institutions with a credit rating above A (48% AAA, 43% AA and A (9%). Equities consist of a placement in a global climate and environment fund managed by a Nordic commercial bank. Money market is placements in a highly liquid moderate yield fund managed by a Nordic commercial bank.

The remaining maturity of placements, counted from the balance sheet date to maturity, is as follows:

Notes to the financial statements

(3) Credits to sovereign states

Credits outstanding according to lending currency:

(EUR 1,000) 31 Dec. 2018 31 Dec. 2017

EUR credits 659,435 513,719
SDR credits 60,629 54,117

Total, outstanding credits 664,341 683,299

SDR credits, impairment 160,629 120,389

Total, outstanding credits including impairment 664,341 673,649

(4) Other loans

Other loans outstanding are distributed as follows:

(EUR 1,000) 31 Dec. 2018 31 Dec. 2017

East Africa Development Bank 4,072 4,041

Total, other loans outstanding 4,072 4,041

Amortisations on other loans outstanding as at 31 December 2018 show the following maturity profile:

(Amounts in EUR) 2018 2017

2018-2019 547 547
2019-2020 1,366 1,366
2020-2021 1,366 1,366
2021-2022 1,093 1,093
Total, other loans outstanding 4,072 4,041

(5) Intangible and tangible assets

Loans with equity features and equity investments are distributed as follows:

(EUR 1,000) 31 Dec. 2018 31 Dec. 2017

Mineral Exploration Fund (AFMY) - 2,923
Mekong Enterprise Fund - 538
responsibility Energy Holding Company (ARKEH) 7,000 7,000
Total, loans with equity features and equity investments outstanding 7,000 7,000
Write-down - 140
Total, loans with equity features and equity investments outstanding after write-down 7,000 7,000

As at 31 December 2018, the write-down for impairment totalled EUR -0.1 million (2017: EUR 0.2 million) based on assessment of the risk of losses which may or may exist.

(6) Impairment of loans and reversals, realised impairments

The total net impairment of loans and reversals, realised impairments on loans during 2018 totalled EUR 0.3 million (2017: EUR 8.2 million). During 2018, realised loan losses amounted to EUR 0.4 million and reversal of impairment losses totalled EUR -0.1 million (2017: EUR 0).

(7) Intangible and tangible assets

Intangible and tangible assets total 13,718 28,943

Compensation for the Board of Directors and the Control Committee is set by the Nordic Council of Ministers. Compensation for the Fund’s Managing Director is set by the Board of Directors and is paid in the form of a fixed annual salary and usual salary-based benefits.

As for other permanently employed Fund staff, the pension benefits for the Managing Director are based on the Finnish Public Sectors Pension Act and a supplementary group pension insurance policy. The Finnish Public Sector pension is calculated on the basis of the employee’s annual taxable income and the applicable age-linked pension accrual rate. The employer’s pension contribution in 2018 was 15.77% of the taxable income. The employee’s pension contribution was either 0.26% or 0.50%, depending on the employee’s age. NDF pays this contribution for its permanent staff, and it is taxed as a benefit for the employee.

In addition to the applicable local social security systems, NDF has taken out for example comprehensive, accident, life, medical and disability insurance policies for its employees in the form of group insurance.

Professional staff (including the Managing Director) who move to Finland for the sole purpose of taking up employment in the Fund are entitled to certain expatriate benefits, such as an expatriate allowance and a spouse/family allowance. In addition, NDF assists the expatriate, for example, with accommodation, usually by renting a house or a flat. The staff member reimburses the Fund the part of the rent, which is equal to at least the taxable value of the accommodation benefit established annually by the Finnish National Board of Taxes.

Staff loans can be granted to permanently employed staff members (including the Managing Director) who have been employed by the Fund for a period of at least one year. The staff loans are granted by a commercial bank, subject to a recommendation from the employer. At present, the maximum loan amount is EUR 230,000. The employee pays interest on the loan in accordance with the official base rate established by the Ministry of Finance in Finland or 0.25% whichever is higher. The same interest charged during the year are presented in the table below. The interest charged corresponds to the normal market rate.

Notes to the financial statements

Compensation for the Chairman of the Board of Directors, the Board, the Control Committee and the Managing Director appears in the table below:

Auditor’s Report

To the Control Committee of Nordic Development Fund

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of Nordic Development Fund (the Fund) which comprise the statement of financial position as at 31 December 2018, and the statement of comprehensive income, statement of changes in equity and statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies. In our opinion the financial statements present fairly, in all material respects, the Nordic Development Fund’s financial position as at 31 December 2018 and its financial performance and its cash flows for the year then ended in accordance with the accounting principles described in the notes to the financial statements.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor’s Responsibilities for the Audit of Financial Statements section of our report.

We are independent of the Fund in accordance with the International Ethics Standards Board of Accountants’ Code of Ethics for Professional Accountants (IESBA Code) together with the ethical requirements that are relevant to our audit of the financial statements, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA code.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other matter

The audit of the financial statements for 2017 was performed by another auditor who submitted an auditor’s report dated 8 March 2018, with unmodified opinions in the Report on the Audit of the Financial Statements. Other Information than the annual accounts

The Board of Directors and the Managing Director are responsible for the other information. The other information comprises information included in the report of the Board of Directors, but does not include the financial statements and our auditor’s report thereon. We have obtained the report of the Board of Directors.

Our opinion on the financial statements does not cover the other information.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

In our opinion, the information in the report of the Board of Directors is consistent with the information in the financial statements.

If, based on the work we have performed on the other information that we obtained prior to the date of this auditor’s report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors and the Managing Director for the Financial Statements

The Board of Directors and the Managing Director are responsible for the preparation and fair presentation of the financial statements in accordance with the accounting principles described in the notes to the financial statements, and for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors and the Managing Director are responsible for assessing the Fund’s ability to continue as going concern, disclosing, as applicable, matters relating to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or cease operations or has no realistic alternative but to do so.

Auditor’s responsibility for the Audit of Financial Statements

Our objectives are to obtain reasonable assurance on whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor’s report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

● Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

● Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund’s internal control.

● Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

● Conclude on the appropriateness of the Board of Directors’ and the Managing Director’s use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund’s ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor’s report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor’s report. However, future events or conditions may cause the Fund to cease to continue as a going concern.

● Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events so in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.
Report on other requirements

Opinion
In addition to our audit of the financial statements, we have also audited the administration of the Board of Directors and the Managing Director of Nordic Development Fund for the year 2018 in accordance with the Terms of the Engagement. In our opinion the administration of the Board of Directors and the Managing Director, in all material aspects, complied with the Statutes of the Fund.

Basis for opinion
We conducted the audit in accordance with generally accepted auditing standards. Our responsibilities under those standards are further described in the Auditor’s Responsibilities section. We are independent of the Fund in accordance with professional ethics for accountants and have otherwise fulfilled our ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinions.

Responsibilities of the Board of Directors and the Managing Director
All the powers of the Fund shall be vested in the Board, which may delegate these powers to the Managing Director or the Nordic Investment Bank or both to the extent considered appropriate based on Section 7 of the Statutes.

The Managing Director is responsible for the conduct of the ordinary operations of the Fund and shall follow the guidelines and instructions given by the Board.

Auditor’s responsibility
Our objective concerning the audit of whether the Board of Directors’ and the Managing Director’s administration have complied with the Statutes of the Fund, is to obtain audit evidence to assess with a reasonable degree of assurance whether any member of the Board of Directors or the Managing Director in any material respect has acted in contravention of the Statutes.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with International Standards on Auditing will always detect actions or omissions that can give rise to liability to the Fund.

As part of an audit in accordance with International Standards on Auditing, we exercise professional judgment and maintain professional skepticism throughout the audit. The examination of the administration is based primarily on the audit of the accounts. Additional audit procedures performed are based on our professional judgment with starting point in risk and materiality. This means that we focus the examination on such actions, areas and relationships that are material for the operations and where deviations and violations would have particular importance for the Fund’s situation. We examine and test decisions undertaken, support for decisions, actions taken and other circumstances that are relevant to our opinion.

Statement by the Control Committee of the Nordic Development Fund on the audit of the administration and accounts of the Fund

To the Nordic Council of Ministers

In accordance with section 9 of the statutes of the Nordic Development Fund, we have been appointed to ensure that the operations of the Fund are conducted in accordance with the Statutes and to bear responsibility for the audit of the Fund. Having completed our assignment for the year 2018, we hereby submit the following report.

The Control Committee met during the financial year as well as after the Fund’s financial statements had been prepared, whereupon the necessary control and examination measures were performed. The Fund’s Annual Report was examined at a meeting in Helsinki on 14 February 2019, at which time we also received the Auditors’ Report submitted on 14 February 2019 by the authorised public accountants appointed by the Control Committee.

Following the audit performed, we note that:
— the Fund’s operations during the financial year have been conducted in accordance with the Statutes, and that
— the financial statements, which comprise the balance sheet as at 31 December 2018, and the income statement, statement of changes in equity and statement of cash flows for the year then ended, and a summary of significant accounting policies and other explanatory notes, are prepared in all material respects in accordance with the accounting principles described in the notes to the financial statements. The financial statements show a loss of EUR 11,476,231.57 which will be carried forward to new account.

We recommend to the Nordic Council of Ministers that:
— the income statement and the balance sheet will be adopted, and
— the Board of Directors and Managing Director will be discharged from liability for the administration of the Fund’s operations during the accounting period examined by us.

Statement by the Control Committee of the Nordic Development Fund on the audit of the administration and accounts of the Fund

Statement by the Control Committee of the Nordic Development Fund on the audit of the administration and accounts of the Fund

Following the audit performed, we note that:
— the Fund’s operations during the financial year have been conducted in accordance with the Statutes, and that
— the financial statements, which comprise the balance sheet as at 31 December 2018, and the income statement, statement of changes in equity and statement of cash flows for the year then ended, and a summary of significant accounting policies and other explanatory notes, are prepared in all material respects in accordance with the accounting principles described in the notes to the financial statements. The financial statements show a loss of EUR 11,476,231.57 which will be carried forward to new account.

We recommend to the Nordic Council of Ministers that:
— the income statement and the balance sheet will be adopted, and
— the Board of Directors and Managing Director will be discharged from liability for the administration of the Fund’s operations during the accounting period examined by us.
